

REMOTE MODEL APPROVAL

Virtual quality reviews meet project milestones fast and eliminate costly travel.

CONFIRM EXCEPTIONAL QUALITY

We are responding to these challenging times with a convenient remote model approval process to give you confidence in the quality of the product. Using the latest technology, the remote review offers the same or better level of quality validation as an in-person approval, with any corrections made and double-checked with follow-up meetings as needed – all without travel expenses.

- **Save Time and Money:** We understand that demanding timelines and tight budgets need a fast, less expensive solution. The cost savings of a remote review is conservatively \$5,000 to \$10,000 per project.

- **Eliminate Risk:** Using the latest technology, you can be certain that the exceptional quality you see will be the same exceptional quality delivered, with perfect results.

TRUST THE GLOBAL LEADER

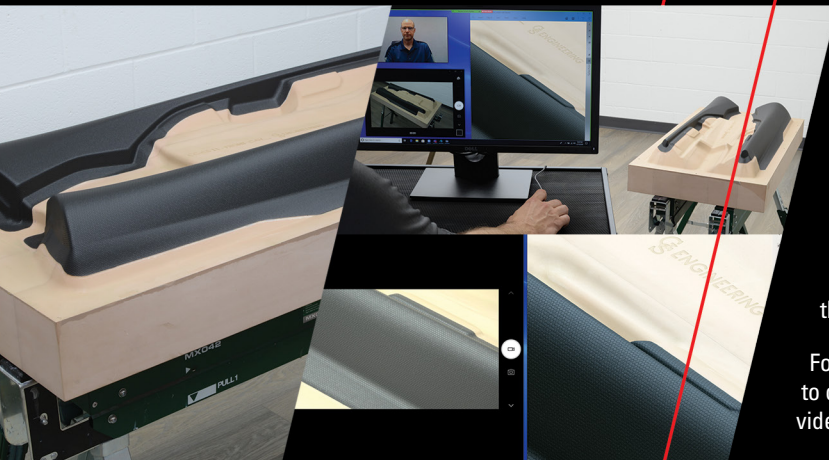

GS Engineering has been producing molds since 2005, working with the largest manufacturers around the globe. IMG molds are guaranteed for program life. GS Engineering is part of Standex Engraving Mold-Tech, a global leader in surface textures and tooling performance, with 46 facilities located in 23 countries.

Remote model approval has been used for dozens of projects all around the world with perfect results for our satisfied customers who tell us that the process provides the same or a better level of quality validation as an in-person approval.

REALTIME RENDER

ACTUAL PHOTO

AN EFFICIENT AND PRECISE PROCESS

For models: First, we approve the cut model; then we review the wrap material; next the cut model is examined and finally the wrapped cut model is approved using high-definition photography and live-streaming video. Realtime rendering software enables you to move around the model in 3D and inspect every fine detail, often better than what's possible with the naked eye.

For mandrels: First, high-definition photographs are taken and made available to download. Additional photos are taken as requested. Then a live-streaming video review is conducted.

CONFIDENCE IN THE RESULTS

Avoid the risk of missed deadlines with a timely, less expensive solution for model and mandrel approvals. As part of the model approval we provide a dimensional report to confirm the model has been manufactured to your specifications. Be confident with the quality of the results, gaining peace of mind without the expense and difficulties of travel.

SCHEDULE A CALL

Schedule a call with Matt Shade, Director of Sales so you can stop spending time and money travelling, and instead have confidence with the quality of the end product, from wherever you are in the world.
